DETAILED ACTION

Examiner's Statement of Reasons for Allowance

1. Claims 1-25 are allowed over prior art.
2. This action is in reply to applicant's correspondence of 15 May 2007.
3. The following is an examiner's statement of reasons for the indication of allowable claimed subject matter.
4. As per claims 1, 21 and 22 generally, prior art of record, Xenitellis, S., 'Security Vulnerabilities in Event-Driven Systems', ISG, Royal Holloway Univ. of London, 2002, entire document, <http://www.isg.rhul.ac.uk/~simos/pub/OLD/SecurityVulnerabilitiesInEvent-drivenSystems.pdf> ('Xenitellis'), fails to teach alone, or in combination, at the time of the invention, the features as discussed and remarked upon in the response of 15 May 2007 to office action of 08 March 2007.

Specifically, (as per claim 1, for example) prior art dealing with operating system aspects of exception processing protection/validation insofar as establishing the architecture involved in the exception handling mechanisms dispatching, protection/validation, etc., (i.e., using a caching model ('Cache Kernel of the V++ OS') architecture versus various 'micro-kernel' architectures; Cheriton, D., et al, 'A Caching Model of Operating System Kernel Functionality', CS Dept., Stanford Univ., 1994, entire document, <http://delivery.acm.org/10.1145/1270000/1267652/p14-cheriton.pdf?key1=1267652&key2=6653845811&coll=&dl=&CFID=15151515&CFTOKEN=6184618>), is generally known per se. Nowhere in the prior art is found collectively the *italicized* claim elements (i.e., the various aspects of hooking exception processing via the exception handler dispatch mechanism that is subsequently stalled upon invocation/validation of said exception handler

Art Unit: 2136

dispatcher exception handling), at the *time of the invention*, serving to patently distinguish the invention from said prior art;

“A method comprising:

hooking

an exception handler dispatcher;

stalling execution of

said exception handler dispatcher

upon invocation of

said exception handler dispatcher; and

determining whether

an exception handling is valid,

wherein

upon a determination that said exception handling is valid,

said method further comprising

allowing said execution of said exception handler dispatcher

to proceed.”.

5. Dependent claims 2-20 and 23-25 are allowable by virtue of their dependencies.

Conclusion

6. Any inquiry concerning this communication or earlier communications from examiner should be directed to Ronald Baum, whose telephone number is (571) 272-3861, and whose unofficial Fax number is (571) 273-3861 and unofficial email is Ronald.baum@uspto.gov. The examiner can normally be reached Monday through Thursday from 8:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nasser Moazzami, can be reached at (571) 272-4195. The Fax number for the organization where this application is assigned is **571-273-8300**.
